Dear Bill and Preston,

Because of the delays in completing the process for the proposed Lynn Springs quarry Plan of Operation (POO) and associated environmental analysis we will be working under the old Lynn Springs quarry Special Use Permit during 1995. This is predicated on getting past operating problems at Lynn Springs to some resolution. Permit fees for 1995 have been paid for the first 100 tons. Remember that any over that 100 tons must be paid for in advance of removal.

I have completed an intensive review of the proposed Lynn Springs POO and have the following questions and or comments:

- 1 Need to know the acres in each claim (353615 and 353616)
- 2 Need all of the parties in each claim. Your plan and the BLM records do not agree.
- 3 Need an estimate of the volumes to be removed each year and the volume of waste rock generated each year.
- 4 The Gate will be OK. We will provide your with the specification for that gate.
- 5 Need a more accurate sketch map. The present map does not reflect the quarry portion that is on the BLM. Map needs to show where the FS/BLM fence will be located through the quarry area.
- 6 Need to state when and where the proposed reclamation will be to get the quarry to below the 5 acres as now in the submitted POO.
- 7 The labor camp will need to comply with Utah regulations. You need to contact Randy Wilder of the Bear River Health Dept. to obtain those requirements. His address is Bear River Health Department, 125 South First West, Tremonton, Utah 84337. His phone is 801 257 3318. How you will comply with the state regulations needs to be put into the POO.
- 8 Need your proposal for road maintenance of all Forest roads you will be using.
- 9 Will you have any fuel/lub storage on site? If so, how much? What is your proposed design for on site fuel storage. Remember that the storage design will require 100% containment of any potential spill.
- 10 Need more detail on your proposed reclamation. (what, where, how, start and finish dates etc.)
- 11 A reclamation bond will be required. The amount of the bond will be based on the amounts of work proposed and how current reclamation will be kept.

If you have any questions about the above or any other part of the POO, give me a call.

Sincerely,

A handwritten signature in cursive script, reading "Gordon Struthers", is written over a horizontal line.
